	Update review 'Nicotine replacement therapy versus control for smoking cessation' ³	✓	✓	✓	Nov 2017
	Update review 'Relapse prevention interventions for smoking cessation' ³	✓	✓		

¹The review is authored by one of the core editorial staff or extra editorial support is needed due to time constraints

²We will apply for, or have received, funding separate to the NIHR Cochrane Infrastructure grant that the Tobacco Addiction Group receive, due to the extra demands of the project

³These reviews will contribute to an overview and network meta-analysis comparing the efficacy of smoking cessation treatments, and therefore are prioritised under the area 'Comparing active interventions'
